Electronic Technologies

Video surveillance - Security Systems - Audiovisual - Optical Fiber - Home Automation – Electricity

## Company

Strong o about 60 years of experiment in the field of telecommunications and technologies of information and communication, SADI provides you its entire technicality and its know-how. Capable of proposing you global offers studied to measure in your listening, SADI strengthen its performances as well as its expertise in the constant search for effective IP solutions for any project types: professionals and individuals.

## Our solutions

---

### Security systems and video surveillance

In order to pilot at best the security, SADI accompanies you and conceives solutions in the whole of your problems in terms of:

- ◆ Access control, intrusion detection system and fire detection,
- ◆ Video surveillance.

### Home Automation

Organized by a centralizes control system allowing to manage at a distance and of an automated way infrastructures (roller blinds, optimization of the energy, lighting, surveillance...)

### Optical fiber and network solution

Integrator of network solutions and telecom, SADI provides you with a global offer of state-of-the-art services, going to the PABX/ IPBX, the ADSL, the WIFI solutions, to the interconnected network, including the optical fiber and IP, TCIP.

### Audiovisual - Antenna

Pioneer in terms of antenna by cable on the Principality of Monaco, SADI, who proves a perfect control of its know-how, knew how to adapt itself to the new digital technologies : study, realization, and network maintenance of television by cable or satellite reception and digital or terrestrial television (installation of home theater ...).

### Electricity

Our skills and expertise allowed us to meet the IP needs always at best for our customers, leading a closeness which drove us to be present in the following domains: alarms (fire, detection...), telephony and electricity.

## Maintenance - GTR (Guaranteed time restoring)

The complementarity of our teams allows us to respect the guarantee of time of restoring (GTR) today so important for the maintenance of any system.

The reactivity in front of emergency situations is for us a daily objective and a succession of a real corporate policy contributing to the continuous improvement of "Our Values".

7j/7 and 24h/24 our technicians are available for emergency interventions: N° of contact is [00377.93.30.30.25](tel:00377.93.30.30.25).

## Our assets

### ◆ Reactivity - closeness

Our strong presence in Principality of Monaco, as well as the technicality of our teams and our equipment's, allows us to our customers services quality at the heart of our actions.

### ◆ Territorial knowledge - technological

Established in 1956, SADI, has an excellent territorial knowledge, but also a robust technological knowledge which it completes by adapting itself and anticipating the new technologies.

### ◆ Skills of the teams

The trainings allow SADI to remain state-of-the-art but also to develop with our collaborators of new skills and the career prospects. This search for the efficiency of our collaborators and for the taking into consideration of their aspiration of careers is a part of a global system of our human resources management.

## Quality approach

Because the quality of our services and the customer's satisfaction are at the heart of our concerns, we obtained the certification **QUALIFELEC** in conformance for Low Current **CF2** accompanied with the grade Optical Fiber, Maintenance and Control and Measure.
